Evaluation Letter

The CREACTION - “CREating with ACt and arTs a safe envIronment in Our ceNters” was implemented in 2023 and had Professional Development Activity in Cyprus that lasted from 21 to 30 of October.

Educational and Cultural Center “On the Wings of Art” was a partner organization in this project and we sent 4 participants who were selected according to their application forms.

The aim of the project was to empower educators to become anti-bullying ambassadors to create sustainable strategies for preventing and handling cases of bullying at youth centers (organisations, schools etc.).

During this project, our participants were engaged in exercises and activities that focused on enabling educators that are working with young people to find possible solutions and strategies against bullying while the cooperation among these educational centers in so different countries will enrich our views on this problem. Our participants were fully satisfied after the project and they are ready to apply new skills and experience in their youth work and future activities.

After coming back home, they organized 4 follow up activities in Ukraine and Poland: workshop about cyberbullying with 30 students at the college, online workshop about opportunities of Erasmus+ program, educational event about preventing bullying with the students of secondary school, workshop in the coworking center for Ukrainian refugees in Poland.

We are looking forward to future collaborations and would be glad to be partners again.

Oksana Nazymok (President)
